

[This workshop](#) of artisan weaving, operates in the territory of Macerata utilizing exclusively old *manual looms*

“The spinning wheel is a traditional tool used for spinning yarn. It consists of a large flywheel and a spindle. The flywheel is turned by hand, which causes the spindle to rotate and spin the yarn. The spinning wheel is a key piece of equipment in the textile industry and is still used today in many traditional weaving workshops.”

[The fabric of the workshop](#) [La Tela](#) (workshop made to see and as a result of the fabric of the workshop)
